DIPARTIMENTO DI MALATTIE INFETTIVE, PARASSITARIE ED IMMUNOMEDIATE

REPARTO: Malattie trasmesse da vettori e sanità internazionale

Roma, 30-01-07

To Whom it may concern

This letter to state that Dr Guglielmo Pampiglione is a parasitologist, well experienced in pest management and control, in particular with a long and reliable experience in the field of the insects of medical importance as well as those infesting food, seed and animal-breedings .

Within these activities, Dr Pampiglione has collaborated with our Institute (the ISS represents the National Institute of Health) in many occasions.

At present Dr Pampiglione is mainly involved in the evaluation and validation of new strategies (methods, devices and products – both chemical and biological) devoted to control the mosquito species that in Central America are responsible of vector borne diseases.

Dr Roberto Romi
Senior Researcher
Unit of vector borne diseases
